## Caledonian Society Presentation Made at Regular Monthly Social

Old-Time Residents Were Honored Prior to Leaving for Scotland.

The social evening held in honor of Mr. and Mrs. A. Fyfe by the Caledonian Society was largely attended by members and friends.

Mr. George Kellock, honorary president of the society, presided, and in a few appropriate remarks presented the guests of honor with a token of remembrance from the members.

Those taking part in the program were Rev. A. E. Larkie, William Smith, J. Kerr of Passburg, J. Russell, Mr. and Mrs. J. Bell, Archie McCulloch, George Reid and Mrs. Dan McEldan.

### SHOWER FOR BRIDE-TO-BE

A miscellaneous shower was held at the home of Mrs. J. Richards on Aug. 14th in honor of Miss Margaret Badham, bride-elect, whose marriage will take place shortly. Whist was played the first prize being won by Mrs. J. Emmerson, and second by Mrs. A. Brown. The mock marriage service was then performed, which proved to be a scream from start to finish, and was greatly enjoyed by all. A very dainty supper was served, a fine bridal cake decorated with Maggie and Jiggs occupied the place of honor in the centre of the table. Sweet Peas and poppies decorated the room.

Mrs. Richards and Mrs. Garner carried in a decorated basket of beautiful and useful presents and presented them to the bride-elect. Miss Badham thanked the ladies for their kindness and thoughtfulness.

After a few more games and more good wishes to the bride-to-be, the party came to an end. Presents were received from the following: Messdames J. Richards, W. Vincent, W. Duff, W. Gate, R. Tiffin, D. Gillespie, D. Nevey, J. Rogers, Smith, W. Westworth, J. Lonsbury, Alex. Easton, J. Nash, J. Emmerson, S. Milley, H. Garner, W. Ronghead, C. Dickson, H. Brown, W. Burrows, M. Joyce, L. Richards, D. Holly, M. Wilson, Gillis, Elsie Garner of Calgary, Gwen Brown, Eileen Richards, W. Cousins, Kilgannon, Fisher, G. Jenkins, A. Cornett, H. Chamberlain, J. Derbyshire and Mrs. Jesse of Sebec.

The first prize in the Rod and Gun Club competition for the heaviest basket of speckled trout was Matthew Wilson. The name of W. Matthew was incorrectly given. Next Sunday the club will hold its fourth competition for the season, at North Fork.

Ann Lenore Morgan of Pincher Creek is visiting her grandparents, Mr. and Mrs. W. H. Hayson.

## Trails---Old and New!

A NEW National Trail is being blazed back to prosperity. The program is pretentious and gigantic. It includes all branches of commerce, industry and agriculture. It calls for unstinted co-operation and loyalty within every unit of the national life. It calls for team-work as exacting as we have ever known. That means that the fundamental code of the entire endeavor is "CO-OPERATION."

In charting the national route which faces toward the goal of plenty for all, it has been interesting to note the directness of the action. This directness has been in the appeal to the separate units to co-operate within their own ranks; to establish codes and to observe them wholeheartedly. It is only in proportion that these units co-operate, separately and collectively, that the big endeavor will succeed.

Coleman's community welfare and its business is a distinctive factor in the national caravan back to better times. Every loyal citizen in Coleman is asked to co-operate to the fullest. This co-operation means the support and patronage of home stores, shops and institutions. In helping to make business better for home merchants, new jobs will be created, better salaries and wages will be paid, and the community will prosper again. Let's all do our bit by co-operating. It is the order of the day.

### MINERS MEETING SUNDAY

The regular monthly meeting of the Coleman Miners Association will be held in the Knights of Pythias hall on Sunday, Aug. 27 at 2:30 p.m., for the transaction of regular business.

### LOCAL AND GENERAL

Mrs. Sherratt and children have been spending a holiday at McBain Lake.

Mr. and Mrs. Hendricks are visiting their daughter, Mrs. Frank Creggan.

Miss Ethel Wilson left on Sunday for Calgary where she will remain for a few days.

Misses Margaret and Ethel Dunlop returned from Edmonton where they have been attending summer school.

Misses Ethel, Mildred and Esther Morris returned to Lethbridge on Sunday.

Mr. and Mrs. Fraser McLeod and family of Lethbridge are visiting in Coleman for a few days.

Mrs. William Burrows and daughter are spending a holiday in Vancouver.

Miss Beattie Kellogg of Michel is spending a short holiday at the home of Mrs. John Salvador.

Mr. and Mrs. Robert Evans are spending two weeks holidays in Spokane.

Mrs. J. T. Hopkins and her daughter, Mrs. Walter Nelson, left on Sunday morning to spend two weeks in Vancouver.

The monthly social evening of Coleman Caledonian Society will be held on Friday, August 25, and will be featured by a whist drive and dance.

Mrs. J. Glendinning has been spending most of the summer in Vancouver, and it is hoped that the change will greatly benefit her health.

S. B. VanDuzee spent a week at McBain Lake, where his wife and children and Mrs. J. R. Atkinson and family have been staying.

Mr. and Mrs. W. L. Rippon and family and Miss Edith Hayson visited at McBain Lake over the week-end.

Dan Morrison left last week for Banff, Midlandvale and various other points. He intends to be away for a month.

Mr. and Mrs. S. Wikox and son Arthur of Brandon are spending two weeks with Mr. and Mrs. J. A. McLeod.

Mrs. T. Brown and Earl, accompanied by the Misses Margaret and Ethel Dunlop, motored to Lethbridge on Monday.

### Sale of Houses

Mr. A. Oliva announces he will sell all his property in Coleman, including four houses, and parties interested may view these any time between now and Saturday evening, Aug. 26. He will be at his house on the corner of Main street east. Will rent, terms to suit party.

### LOCAL AND GENERAL

A son was born to Mr. and Mrs. Ross G. Powell at Calgary on August 21st. Mr. Powell was school principal here a few years ago, and has since been on the staff of Central high school.

T. Burns and daughter Olive will leave on Thursday for Vancouver, accompanying John and George Rushton, who are going to bring their mother home, after several weeks' stay in that city.

Rev. W. K. Jeffcott of Pincher Creek held communion service on Sunday in St. Alban's church. Next Sunday Rev. A. S. Partington will conduct evening service, after having spent three weeks on vacation in British Columbia.

A bridge party was held at the home of Mrs. D. A. Mackinnon Friday afternoon when three tables were in play. The party was held in honor of Mrs. Keit, who left Sunday morning for Summerside, Prince Edward Island.

Mrs. Fenton-Smith captured first prize with Mrs. Duggie Smith the consolation. Tea was served by the hostesses which was much enjoyed by those present—Kimberly Courier.

N. P. Eastwood, more familiarly known as "Bob the Tailor," returned last week from several weeks' pleasant vacation in Vancouver. He stayed at the Dufrin hotel, managed by Adam Patterson, who many years ago operated the present Empire hotel, then known as the Pacific hotel. Bob enjoyed his holiday and saw a lot of the city during his visit, besides a pleasant visit to Victoria, where he visited the points of interest, including the "Coach and Horses" out at Esquimalt.

Among the kitchen gardens which caught the eye of the Journal roving reporter were those of Mr. Hopkins Sr. and William Graham. Mr. Hopkins has some broad beans which are splendid in their fullness, and demonstrate that even at this high altitude garden produce may be brought to maturity in good time. Time spent in gardens such as these furnishes pleasure, and incidentally some profit in providing for the table. There is the added pleasure of having "grown your own."

"Bill" Burrows has a hobby—in fact two hobbies. One is boxing, which unquestionably bespeaks action and energy, even as a referee, for he has got beyond the stage where he will take on all comers, as one cannot keep as young as they would wish. His other hobby is gardening, and a glance at the fine plot at the town hall will speedily convince you of his ability in that line. In the spring it was a general sight today it is a source of pride and pleasure to behold. This garden would rank highly in a better gardens competition.

### UNITED CHURCH NOTES

Services both morning and evening will be held in St. Paul's United church, Sunday, Aug. 27, with the minister in charge. The congregations last Sunday were good, and we look

## Widespread Interest In Boxing Matches---Two Provinces Represented

LOOKS LIKE A BIG NIGHT ON SATURDAY AT COLEMAN ARENA

A good program for Saturday night is promised at the Arena, when Murdo Morrison of Kimberley and Duke Hyssop of Lethbridge meet in a ten round middleweight fight, and Jimmy Burrill, the Pass lightweight favorite, and Angus Morrison, also of Kimberley, engage in ten rounds. Three good prelims are on the card, with William Burrows as referee. Time-keepers, W. H. Chappell of Blairmore and G. R. Powell of Coleman. Announcer, W. C. Stone of Corbin. Program opens at 9 p.m.

Angus Morrison, with an impressive list of wins in the ring, journeys to Coleman on the 26th of this month to battle against Jimmy Burrill. At the present time Angus has a record of 14 straight wins in his last bouts and hopes to make it one more, although he will be up against a tough boy. Murdo Morrison also swings into action again, after quite a long lay off when he tackles Duke Hyssop on the same card that Angus appears. Camp folks in particular and Kimberley folks in general will be pulling hard for the local lads to come out on top, and keep Camp and Kimberley in the public eye as a sports centre.—Kimberley Courier opens at 9 p.m.

### SPANISH PRISONER—AN OLD "GAG"

Walter Bobbitt is one who received an appealing letter from the Spanish "prisoner" who is languishing in Spain and has been for the Lord knows how many years. This fraudulent appeal has been on the go for 25 years, and authorities report that certain gullible people fall for this appeal, whereby they are asked to send money to help the unfortunate prisoner recover hidden treasure or save him from bankruptcy. The prize price of the letter is the poster, which says: "The utmost reserve and discretion are requested. Above all, please wire, do not send letter."

forward to an increase in attendance from now on. Will you do your part to ensure this?

In the morning Mr. Taylor will be on "Mountain Scenes from the Bible." The first in the series will be entitled "The Annunciation of the Mounts."

We need to direct our vision in these trying days to the higher altitudes of life.

The evening sermon will be on the theme: "At the Place of Jesus."

At the conclusion of the morning service there will be a meeting of the congregation when matters of very great importance will be brought to the attention of the congregation.

## Building Material

## Prices Going Up! Labor Still Low Build and Repair Now

WISE investors interested in building their own homes or homes for rent or for sale know that now is the time to build. The increased activity in small home building throughout the country and in Coleman testifies to the advantageous prices of materials and labor at the present time, and forecasts an early increase. Let us quote you prices now. A small deposit will hold your materials for future use.

## Blue Shirts Parade In Ireland Despite The De Valera Edict

Dublin, Ireland.—General Owen O'Duffy, leader of the Blue Shirt national guard, declared Sunday night that, in spite of the legal and constitutional character of his organization, the government declares it unlawful, "the government shall be guilty of a positive act of tyranny."

Headquarters of the Blue Shirt group declared parades had been held throughout the country, as previously arranged. Although uneasiness existed throughout the Free State the day passed in comparative quiet.

(President Eamon de Valera, speaking at a party rally in Thurles, declared if reports were received by the Minister of Justice that the Blue Shirts had paraded in uniform, the executive council would declare the organization illegal).

The government's declaration, O'Duffy asserted, "will be a lying declaration devoid of moral force and consequently the national guard will neither dissolve nor allow itself to be driven underground."

It was learned instructions were issued to the police to give the fullest possible protection to the Blue Shirts. Two minor incidents, however, indicated the existing tension.

At O'Connell Bridge a small crowd attacked a man alleged to be in sympathy with the Blue Shirt movement. Police intervened and restored order, removing the man from harm.

In Cork a party of men wearing republican army badges marched to the headquarters of the national guard and tore the flag flying from a window. National guardsmen intervened and a scuffle followed in which the flag was torn. The raiders burned the captured portion in the streets.

While the program of Blue Shirt parades was kept secret it was known that two were held near Dublin and one at Cork, both with great success.

A message from General Owen O'Duffy, leader of the organization, was read at each parade after a two-minute silence honor of the late Irish leaders, Arthur Griffith, Michael Collins and Kevin O'Higgins.

"The best tribute we can pay the dead is our resolve to carry on the work," General O'Duffy's message said.

"No good to Ireland can ever come from frantic squabbles of warring parties. If politics has come to mean squabbles the time has come to abolish politics. In that meaning we are vanguards of a new era in Ireland and nothing is going to halt our march until we have attained an Ireland united, peaceful, prosperous, free and honored."

### U.S. Recovery Plan

Entire World Is Watching Results With Interest

Washington.—Prime Minister G. W. Forbes, of New Zealand, a visitor in Washington, says in a statement that in his opinion not only the United States but the entire world has a "vital stake in the success of President Roosevelt's recovery plan."

"New Zealand is following the course of business recovery plans in the United States with the keenest possible interest, and with every hope that they will be fully successful."

## Railway Wage Action May Be Instituted In Western Canada

Ottawa, Ont.—Legal action to recover monies deducted by Canadian railway companies from employees since February 1 last probably will be initiated in one of the western provinces. This indication was given by Senator James Murdock, vice-president of the Brotherhood of Railway Trainmen, in an intimation that suit would not be started in Ontario or Quebec. Definite decision, however, has yet to be made.

The contention of the men is that basic wages were automatically restored by the expiry on January 31 last, of the February, 1932, agreement for a 10 per cent. cut for a year. Notwithstanding this fact, the employees claim, the companies continued the 15 per cent deduction three months beyond the expiry period and later the railways put into effect an

additional 10 per cent. deduction from the basic rates.

Montreal, Quebec.—There is no question in the minds of railway officials with regard to the absolute legality of the wage deductions that the railways have been compelled to make as a result of present conditions. It was declared in a statement issued by acting President S. J. Hungerford of the Canadian National Railways, and Vice-President Grant Hall, of the Canadian Pacific Railway.

The statement was made in reply to queries regarding the suit against the railways reported to have been threatened by Senator Murdock, vice-president of the Brotherhood of Railway Trainmen. "We would not, of course, allow deductions from wages of employees, if we believed them to be illegal," the railways' statement said.

### Investigate Cuban Affairs

Probe Bank Accounts Of Deposed President Machado  
Havana.—Bank accounts and properties of the deposed President G. F. Machado and his followers were investigated with a view to regulation by their successors.

Secretary of the Treasury Joaquín Martínez Sainza, a leader in the A. B. C. Secret Society, began the probe as Provisional President Carlos Manuel de Céspedes' administration weeded out persons suspected of profiting by the Machado regime. It was reliably reported embargoes are planned on fortunes and property of the Machadistas.

Reports from the Bahamas said the erstwhile president planned to rent a place near Nassau.

### Take Toll Of Crops

Insect Pests Play Havoc With Western Grain Fields

Montreal, Quebec.—Drouth, frost, grasshoppers and sawflies are still at work on the western grain fields, according to the telegraphic crop report of the Bank of Montreal, but harvesting is under way on the prairies and threshing is fairly general in Manitoba and has begun in southern Saskatchewan.

Conditions continue favorable in the northern areas of the prairies, the report says. Southern and central areas are still suffering from drouth, frosts have caused further damage in Alberta and sawflies have caused some destruction in Saskatchewan.

### Trial Shipment Possible

Cattle Available For Export Via Hudson Bay Route

Saskatoon, Sask.—Possibility of a trial shipment of cattle to England this fall via the Hudson Bay route still exists, according to information gained here.

A large livestock company, in a communication to the Saskatchewan Board of Trade, pointed out that the firm could furnish 200 head of cattle for such a shipment. This company is in communication with overseas buyers. It also is known, too, that a limited number of cattle suitable for overseas shipment still are available in the Saskatoon district.

### Current Slang

Filipino Member At Pacific Relations Conference Has Technique

Manila, Philippines.—Penetration into Pacific countries of current North American slang was indicated here, at a round table session of the Institute of Pacific Relations.

A Filipino member, discussing the trend of Japanese population in Japan, mentioned the volume of immigration and migration altered with economic circumstances. "When times are good," he concluded, "they stick around; but, when times are bad, they beat it."

### Wheat Grades Vary

Ottawa, Ont.—The wheat harvest in western Canada is proceeding rapidly and early threshing results show a great variation with grades generally high, states the weekly telegraphic crop report issued by the Dominion Bureau of Statistics.

### INVITED TO SET NEW RECORD

When asked by Major Louis D. Taylor, to make a flight across Canada, possibly non-stop, the smiling British flying family of Captain Jim and Amy Mollison stated they will certainly bear it in mind. Unfortunately it will take two months to have a "plane ready for the long hop from Vancouver to Halifax and the idea has been fied away for future reference. Our pictures show the intrepid flyers who successfully navigated a non-stop flight from England to the United States only to crash within sight of their goal. Inset is a picture of Vancouver's popular Mayor.

### FEARS STRIKE POSSIBLE

Senator James Murdock, Chairman of the Canadian Brotherhood of Railway Trainmen, who stated at Montreal recently that if there was no change in the attitude of the railways on the second wage cut he believed the running trades would go on strike throughout Canada.

### To Aid U.S. Farmer

Processing Taxes On Wheat and Cotton Is Plan

Washington.—Secretary of Agriculture Wallace told newspapermen there was a prospect of additional processing taxes on wheat and cotton if the price of the products continued to drop.

The processing tax is a levy paid by the manufacturer or processor of wheat and cotton, which in turn goes to the farmer in benefit payments for his agreement to cut production.

In the case of wheat, the present tax is 30 cents a bushel and on cotton it is 42 cents a lint pound.

The effort will be made, they said, because of a large surplus of grain in that area which they believe will have a depressing effect upon prices of wheat in other sections of the country.

At the same time, Secretary Wallace told newspapermen he had received word from friends in Europe there is an increasing prospect of an international wheat production curtailment agreement being reached at the London conference which will be recovered on Monday.

"It is hard for me to believe, though," Wallace said. Earlier he said a program of "subsidized exportation" of wheat will be undertaken in the United States in event that other of the chief wheat-producing nations fail to reach an agreement for curbing their output.

### Thinks Inflation Necessary

Manila, Philippines.—Belief United States would have to inflate its currency if the Industrial Recovery Act was to function successfully was expressed by Professor E. T. Gregory, of University of London, a member of the British group attending the fifth biennial convention of the Institute of Pacific Relations here.

### No Change Yet

Washington.—Inquiries at the White House on President Roosevelt's policy for inflation and managed currency brought the response that there had been no change and that future action depends on conditions.

## Survey Given Of The Relationship Between Banker And Farmer

### Recompense Farmers

Millions Of Dollars To Be Paid To United States Growers

Washington.—Millions of dollars in benefit payments to cotton and wheat farmers for agreements to curtail their production will be freed under a policy made public by Henry Morgenthau, Jr., governor of the farm credit administration, after approval by President Roosevelt.

Under it, payments will be made to cotton farmers, who agreed to plow up 25 to 50 per cent of their growing crops, without requiring deductions for acreages they owe the government for seed and crop production loans.

Morgenthau said a similar policy will be pursued in the case of payments to be made this fall to wheat farmers for agreements to reduce their acreages planted for harvest in 1934 and 1935.

About \$90,000,000 is scheduled for distribution to wheat farmers and \$110,000,000 to cotton farmers.

Where the farm credit administration has a claim against the farmer, the benefit cheque will be made out jointly to the farmer and the administration.

### Seaplane Tragedy

Three Lives Are Lost In Crash In British Columbia

Vancouver, B.C.—Fog hovering over Anderson Lake, 115 miles north of Vancouver, was believed responsible for loss of three lives, one of a woman, and serious injury to two other occupants of a seaplane which crashed into the lake at dusk Tuesday evening. A sixth occupant was slightly hurt.

The machine, piloted by Gordon K. Mackenzie, left Vancouver for Bridge River carrying five passengers.

Ernest Dean, 38, with his wife, a bride of a few months, bound for Bridge River, and W. J. Butt, 50, Vancouver, business man and proprietor of McKillivray Lodge, near the scene of the accident, lost their lives, while Pilot Mackenzie and Olie Desner, Prince Rupert mining man, suffered fractured skulls and other injuries.

A. Gray Parker, sixth occupant of the machine, escaped with only minor hurts.

### Returns From Northern Trip

Major-General MacBrien Inspects Posts At Herschel Island

Edmonton, Alberta.—Major-General J. H. MacBrien, C.M.G., D.S.O., commissioner of the R.C.M.P., arrived here after making an aeroplane trip as far north as Herschel Island to inspect posts. He made the flight from Herschel Island in 48 hours aboard an R.C.A.F. Fairchild piloted by Squadron Leader E. L. McLeod.

The commissioner expressed himself as delighted with the trip. He had no announcements to make, being stating that there was a possibility of some changes.

### Alberta's Debt Reduced

Edmonton, Alberta.—Reduction of \$4,371,458 in Alberta's public debt is indicated in the first quarterly statement of the provincial government issued recently. This leaves the net funded and unfunded debt, as at June 30, at \$140,237,273.

Calgary, Alberta.—Canada's banking system was blamed for the difficult economic conditions existing in Alberta by R. W. Pilling, prominent Calgary business man and surveyor farmer, in a comprehensive survey of the relationship between farmer and banker delivered before the royal commission on banking in one-day session last night.

Mr. Pilling declared neither the farmer nor the banker is at fault for an undoubted lack of confidence existing between the two. Rather, he said, the fault lies with the system of issuing short term notes with both banker and farmer knowing at the time the note cannot be met for a period of a year or until the farmer harvests his crop.

There are three groups of borrowers, Mr. Pilling said: The favored group, the deserving group and the group that is not so deserving. "I have led the parade of all three groups," he added, "so I am well fitted to discuss them."

Although they have known at the time of signing it would be impossible for them to meet their notes farmers have naturally believed bankers would renew short term notes when necessary.

Mr. Pilling explained, however, in many cases the bank manager familiar with the character and financial condition of his clients is transferred and the new manager has demanded payment immediately upon his arrival at the banking district.

This fact has led often to the distinction between favored and deserving borrowers, said Mr. Pilling. The new manager usually mistrusts the man upon whom he has forced payment and he becomes merely a despoiling horror. Another client of the bank gains the confidence of the manager and is loaned money with which to buy the deserving borrower's stock so that he may meet his note.

"Then, too," said Mr. Pilling, "we believe in the west easterners dictate our banking policies without due consideration of our needs. We believe directors sit around a table in the east and dictate how much money will be loaned in the west and how much will be recalled."

The farmers, too, he declared, have increased the mutual mistrust between them and the bankers. For years the farmers have counted on renewing notes frequently without opposition of the bankers until they have gradually grown lax in making final payments.

F. C. Brown, Acme rancher, declared it was necessary for banks to extend credit for more than 60 days, as has been the custom. He presented cancelled promissory notes that had been renewed three and four times at intervals of 30 and 90 days with interest accumulated at eight per cent. He declared eight per cent. had been the standard rate throughout the years of his banking transactions.

Mr. Brown contended farmers and ranchers needed at least a year and often more of uninterrupted credit in which to enter their production. Therefore, he said, the banks should make their loans with such an understanding.

The plan in Canada, whether acreage reduction or not, and how much, would be left to the individual farmer but he could not sell more than the quota allotted him," said Mr. Hull.

The Canadian system, he claimed, had several advantages. It did away with the need for compensation, which was provided for in the U.S. by a process that it gave the farmer more latitude, the statistician declared. If weather proved adverse, he was protected. He could use any surplus for feed, or store it.

## Quota System Plan Proposed To Reduce Canadian Wheat Surplus

Winnipeg, Man.—Canada and the United States are following different paths in their effort to cut down the world's wheat surplus, according to J. T. Hull, Canadian wheat pool statistician.

The Canadian wheat pools advocate a quota system while in the U.S. Secretary of Agriculture Wallace is putting into operation an acreage reduction scheme, said Mr. Hull. In the Dominion, he explained, it was proposed to establish a quota, limiting the deliveries by each individual farmer to his country elevator.

The quota would be based on the

farmer's average deliveries over a period of years.

"The plan in Canada, whether acreage reduction or not, and how much, would be left to the individual farmer but he could not sell more than the quota allotted him," said Mr. Hull.

The Canadian system, he claimed, had several advantages. It did away with the need for compensation, which was provided for in the U.S. by a process that it gave the farmer more latitude, the statistician declared. If weather proved adverse, he was protected. He could use any surplus for feed, or store it.

### Local News

J. R. Atkinson spent Sunday with his family at McLean's Lake. Sheila Devine spent last week in Lethbridge visiting friends. She was accompanied on her return by Mrs. K. MacDonald, who remained for two days.

### USE RECOGNIZED WEEKLIES

After resorting to various kinds of advertising during the past two years announcement has been made by many of the larger concerns in Canada that they will again use the better class weeklies, many of them securing exclusive contracts for advertising purposes in place of the free distributed circulars, tried out during the past twelve months, which have been disappointing. A study of advertising problems, coupled with a thorough distribution through the regular post office channels has proven that this form of advertising has been responsible for steadier sales volume—Cranbrook Courier.

### NOTES AND COMMENTS

**INSPIRATION** is something required every day by all. Some have the enthusiasm and faith in their own ability to carry on in the face of difficulties which is the best kind of inspiration, for it inspires others.

While millions seek for a solution of problems of the day, President Roosevelt has set a good lead by putting into action his National Recovery Act. It aims to stabilize every industry, whereby every worker will receive a fair wage and the seller of goods a just profit. Every industry is to have a code, which it is calculated will eliminate much of the cut-throat competition which in turn is the cause of sweated labor in certain industries.

**THE** general public indirectly helps to promote sweatshop conditions. Departmental and mail order houses of the cities often advertise goods which cause people to wonder how they can be sold at the price. Investigation in certain areas of the United States has revealed some scandalous conditions under which women and children work to make possible these bargains which shoppers so eagerly seek.

**THE** practice of asking a dozen firms to tender on an order for goods from needles and pins to things of much higher value quite often gives the "scab" firm which does not observe any code in relation to wages or working conditions an unfair advantage over firms who maintain a decent standard. Some tender who do not a stroke of the work themselves, having neither technical knowledge, equipment, or the necessary capital. They scour the whole country to find who will do the work—the cheapest and then base their tender on the prices obtained from outlaw firms who in turn may not be able to pay their creditors, simply because they have sold their product at less than cost, and possibly left their employees to get their wages as best they can.

**UNDER** the N. R. A. it is hoped abuses of this nature will be eliminated or at least curtailed, for there are always pirates who will not observe any code, not even honor among thieves. It the plan succeeds in the United States, doubtless other countries will follow the example of President Roosevelt, with Canada being probably the first to adopt a similar plan to help industrial recovery and distribute jobs among more workers.

### NEWS GIVES, ADVERTISING SEEKS!

Advertiser: "Yes, that's something they'll all want to know."  
Ad. Solicitor: "Then its advertising and will be charged for."  
Advertiser: "Certainly not; that's just a good news story."  
Ad. Solicitor: "Well, if it has no value to you as advertising, certainly it makes no difference to you whether we publish the article or not. And if it has no advertising value, we don't think it has news value."—Ex.

### CLASSIFIED ADVERTISEMENTS

**FOR SALE**—Fire Wood, in stove lengths or logs, large load \$5. Agent for Lundbreck coal. Moving and hauling of all kinds. Alex L. Easton.

**FOR SALE**—Shot gun in good condition. Apply to Mrs. John Watson, Creston, B. C. or Journal office.

**FOR SALE**—Complete set of grade ten Literature texts. Apply Journal office.

### Modern House for Sale

6 room house in West Coleman, full size basement, hot water heating, bath room and complete plumbing fixtures, closed verandah, garage, chicken coop, etc. Enquire at Journal office.

### Important to Dairymen and Cowkeepers

I am making arrangements to have carloads of Alfalfa and Brome Hay from Lethbridge and other districts shipped to Coleman for dairymen who may require first grade dairy feed. First car of Alfalfa, second cutting, should be in Coleman on Saturday of this week. Cars will arrive as often as required.—R. Henderson, Sales Agency, Pincher Creek, (late salesman for Pincher Creek Co-Operative Ass'n.) Orders given to Joe Plante will receive attention.

## Tests Are Being Made In Extensive Program To Improve Quality Of Western Wheat

Details of an extensive program to improve western wheat crops and thereby raise the premium which Canada obtains on world markets for her grain were revealed by Dr. L. H. Newman, Dominion cerealist from Ottawa, who is carrying out tests of the west with Major H. G. L. Strange, former wheat king of the world.

Description of the extensive scheme was given by Dr. Newman in this manner: "We are endeavoring," he said, "to obtain a picture of the varieties of wheat being grown across the northern farm belt to learn where the grain is fairly pure and where it is badly mixed. Now that we are getting this picture we are trying to improve the seed used by the farmers."

"Last fall," the cerealist explained, "samples of grain were collected from 6,100 farm wagons at country elevator points and this year grain has been grown from this seed. We established 16 group plots with about 400 small plots at each. Now we are going over grain samples at each place. Field days, too, are being held simultaneously with the identification of the varieties."

"In some cases, the farmers did not even know the name of the varieties of wheat they were growing. The farmers, at the time the samples were taken last fall, were asked to give the name of the variety they thought they had. This was noted by the elevator man concerned and the grain was graded. Now, we are classifying the resulting grain under these three heads: Good, which is fairly pure seed which can be used; passable, suitable seed for carrying on with for a while, and undesirable, made up of a number of varieties which should not be used for seed."

### Defies Superstition

#### S.S. Pennyworth Trip Takes No Notice Of Ill Omens

In setting a record passage of three days through Hudson Strait and Bay, the S.S. Pennyworth defied all the ill omens of the sea and defeated three ships in the race to be first vessel into the new Canadian port this season. First of her triumphant docking was accomplished Sunday, the 13th.

She sailed from both Glasgow and Antwerp on Friday, and made her landfall at Resolute Island 13 days after clearing from Antwerp. She picked up her pilot at Churchill Sunday at 13 hours 13 minutes, ship's time, 13 days after leaving the British Isles at Pentland Firth, and so became the 13th ship to reach Churchill from Europe since the port was established two years ago.

When the ship's log was hauled in outside Churchill harbor, it registered exactly 13 miles, and the forward end showed a draft of exactly 13 feet when the ship was moored at the dock.

And then Captain Giffon remembered he celebrates his birthday on the 13th.

### Quite An Occasion

#### Royalty Used To Take Ocean Dip With Great Ceremony

It is said to hear of George the Third's bathing machine, with its royal arms, fulfilling the function of a toilet shed; Weymouth should have a better memory than that. It might remember that day which Fanny Burney speaks of, when his majesty stopped down to the briny to the strains of the National Anthem secreted in a neighboring machine. It took the art of bathing a long time to shake off the ceremonial touch. When the Duchess de Berri visited her bathing cabin on the beach at Dieppe, she was received with a salvo of artillery; after which "the Inspector de Bains, clad in a resplendent uniform, cocked hat, and white gloves, led her royal highness into the sea until the water reached his knees, when he retired with three profound obeisances."—London Observer.

### Daylight Films

Film theatres in Rome have adopted the invention of an Italian scientist which permits them to show moving pictures by daylight or when the playhouses are brightly illuminated. Numbers of patrons to whom darkness is an attraction while pictures are being exhibited are protesting.

Argentina expects bumper crops this season.

W. N. U. 2004

### More Radio Channels

#### Wider Range May Be Made Available In North America

Additional frequencies would be available for broadcasting in North America as a result of the regional radio conference at Mexico City, Col. W. A. Steel, technical member of the Canadian Radio Commission, explained on his return to commission headquarters at Ottawa from attendance at the conference. The band of frequencies between 1,500 and 1,600 kilocycles might be used for broadcasting on this continent should the various countries so desire.

The band at present used for broadcasting was from 550 to 1,500 kilocycles, Col. Steel stated. In this band Canada had 36 channels of which nine were clear and the others shared. By extending the band to 1,600 kilocycles, 10 more channels would be available and it was possible Canada would receive four of them. Another regional conference would likely be held within twelve months.

"The regional radio conference at Mexico City was faced with two separate and distinct problems," said Col. Steel.

First, the North American conference of 1928, dealing with the use of the regional short wave bands between 1,500 and 5,000 kilocycles, was rendered useless by the fact that Cuba had withdrawn from the pact in October, 1932. These channels had therefore to be re-allocated in accordance with the development of the science during the past five years, and with the Madrid conference of 1932.

Second, the sub-division of the broadcast channels among the North American nations in such a way as to make possible an efficient national service for each country, without interference between the broadcast stations of adjacent nations.

"It is pointed out that, by the terms of the invitation from the Mexican government, no definite agreement was signed at Mexico, but instead a series of recommendations was prepared and the delegates agreed to take these recommendations back to their respective countries for the consideration of their governments. It is hoped that these recommendations may serve as a basis for a new agreement that will be reached by the North American nations through the recognized diplomatic channels."

### Soil Fertility

#### Condition and Texture Is As Essential As Chemical Composition

In considering the matter of soil fertility and the value of soil analysis, it is well to bear in mind, says the Dominion Chemist, that the productivity or fertility of a soil is by no means entirely determined by the percentages of plant food constituents present, nor even by the proportions of those which may be actually available for immediate crop use. The soil, for thrifty and profitable growth, must not only contain a sufficiency of the chemical elements in readily assimilable form to supply the food requirements of the crop, but the soil must be of such a mechanical condition or texture as to offer a fine seed bed for germination, and permit of a ready extension of the root system as growth advances. While allowing free water to pass through and drain away, the soil must have an absorptive capacity to hold over sufficient moisture for the supply of the crop during periods of drought. This is very important. It must not be too close and compact to exclude air and, at the same time, it must be firm enough and fine enough to give the plant support and retain moisture. Such land is said to be in "good heart," or, otherwise stated, mellow, friable and favourable tilth. This condition is consequent upon its proportion of sand to clay and particularly upon its percentage of humus, or semi-decay vegetable matter, derived from manures or crop residues.

A portable telephone has been invented to enable a motorist, carrying the instrument in his car, to plug in at sockets attached at frequent intervals to telephone lines and get a connection without leaving his car.

Photographic plates are now kept in refrigerators to preserve their quality and uniformity. This treatment is particularly adapted to plates intended for astronomical purposes.

### May Refine U.S. Gold Here

#### Plan To Ship U.S. Gold Ore To Canada For Smelting

The bulk of the United States' annual production of gold ore and concentrates approximating 40,000,000 may soon be smelted and refined in Canada. From large and small gold mine owners in scattered parts of the U.S. Republic, permission has been asked from the Dominion Government to ship their ore and concentrates into this country. Representatives of gold mines in Alaska have asked for similar permission.

While the requests are now before the Department of Finance, decision will have to be made by cabinet council. A very reasonable likelihood, it is intimated, exists of the applications being granted.

Under the proposal, the United States mine interests would be able to receive world market prices for their gold in place of the fixed American mint price of \$20.67 per ounce. The average price in Canada of late has been running about \$28.50 per ounce.

Canadian smelters in northern Ontario, and at Trail, B.C., would smelt the U.S. and Alaska gold ore and concentrates. It was stated, if the proposal is achieved. The process of refining into pure gold would be performed at the Royal Mint at Ottawa. If the requests are granted, regulations of the Canadian mint which provide for refining the incoming gold of Canadian-owned gold, of necessity will be broadened.

The way to ship gold concentrates and "unsmelted ore" out of the United States was cleared in Washington recently when gold export prohibitions were amended by the treasury department to permit the metal being sent out of the republic in those forms. Unrefined amalgam and cyanide precipitates also are allowed to be shipped out under the Washington ruling.

Canada's embargo of October, 1931, against the shipment of gold from Canada is still effective. This decree prohibits shipping gold out of this country except under license. Since that date, the Dominion has been paying a premium on gold to Canadian mine owners who are receiving world prevailing prices.

With few exceptions, the Dominion Government has been the only shipper of gold from Canada since October, 1931. In the instances where permission has been granted by the department of finance to export gold, the licenses, it is stated, have been where certain impurities require special refining treatment and the gold in its final refined state was shipped into Canada.

The question has been raised that United States gold coins might be converted into Canadian currency, producing a profit by the process through reconversion into U.S. funds. Official enquiry elicits the statement that conversion of U.S. gold coins into Canadian currency would have to be done in the final act through the Royal mint and such conversion is prohibited. No United States gold, it is declared, has been purchased by the Dominion Government in Canada during the past 20 months.

### Predicts Toothless Race

Dr. Hugh MacMillan, of Cincinnati, predicted human teeth are destined to become useless appendages—in 100,000 years or so. In a semi-jocular vein he told delegates to the central dental congress at Chicago, concentrated pre-digested foods in the distant future would make teeth unnecessary.

## Individual Effort of Every Citizen Is Needed To Work For Solution And Elimination of Economic Ills

### Air And Stored Potatoes

#### Thorough Circulation of Air Is Necessary To Keep Stored Potatoes in Good Condition

Careless storing of wet potatoes is responsible for unnecessary annual losses. Potatoes ought to be stored dry in a cool, well-ventilated cellar which is perfectly dark. Piling potatoes in heaps in warm and poorly ventilated cellars creates the most favourable conditions for rotting. Before placing the potatoes in a cellar, wooden slats slightly apart should be nailed about six inches or more from the wall, and a temporary floor with cracks between the boards should be laid about six inches above the permanent floor. This will ensure air to circulate around and under the pile of potatoes. If it should so happen that the pile has to be very large, square ventilators made of wooden slats and running from top to bottom of the pile should be put in here and there. Together with the circulation of air at the sides and at the bottom of the pile, these ventilators will keep the potatoes in a much better condition than if they were in a solid pile. Another good plan recommended by the Dominion Department of Agriculture is to keep the potatoes in large crates made with slats, the ventilation between the crates assisting very much in keeping the potatoes in good condition. The temperature of the storehouse or cellar should be kept at nearly 35 or 36 degrees Fahrenheit as possible.

### Names Just Reversed

#### Puzzle Of Odd Signs In New York Easily Explained

The business of one of those observant fellows who are bothered by odd signs has taken him along Chrysler Street several times of late, and he discovered a peculiar thing. At No. 63 is a firm of jewelers named Kovitz & Pashutsky, and five doors away, at No. 51 is the jewelry firm of Pashutsky & Kovitz. This got on his mind to a point where he went into one of the places and demanded an explanation, which was graciously given as follows: The firm of Kovitz & Pashutsky was founded at No. 63 fifteen years ago, and the two partners took a younger brother of each in as clerk. All went smoothly until it was felt the firm wasn't doing well enough to support all four. The younger brothers were advised to seek new jobs. They went up the street and opened a shop, reversing the names in the original title. There was some hard feeling at first, but now all speak cordially when they meet. Both firms seem to get enough business.—The New Yorker.

### New Definition

An optimist is a man who rejoices in news of drought, floods, locusts, chinch bugs, tumbleweeds, phylloxera, hoof and mouth disease, boll weevils and other constructive forces tending to raise prices. A pessimist is a man who disseminates news about fine growing weather, thriving crops and other factors inimical to a firm price structure.

Each passenger riding in a Turkish commercial aviation airplane is automatically insured for \$4,700.

### LORD BESSBOROUGH VISITS MILITARY CAMP AT PETAWAWA

Our picture, taken when the Governor-General visited Petawawa Camp, Ontario, shows His Excellency observing artillery fire through powerful glasses while Major-General McNaughton, Chief of the General Staff, looks on. On the right of the picture can be seen Lord Duncannon, son of Lord Bessborough.—Photo by Artana Studio, Pembroke, Ontario.

Individual effort by every citizen in frankly facing his or her problem and thereby making a maximum effort towards its solution was the high road toward elimination of economic difficulties. Speaking at Ottawa recently, Hon. H. H. Stevens, Minister of Trade and Commerce, put forward this belief.

"First," said Mr. Stevens, "the individual citizen should study how his or she can contribute towards the relief of those in need. Not by giving charity but by a sane effort to use the resources that each has in a useful way so as to provide added employment for those who require it." Painting or repairing the home, purchase of clothing or any other useful means, he illustrated, would give employment of personal resources and afford the first contribution which could be made at this time.

"I challenge the right of a landlord to receive rentals from an insubstantial and dilapidated building when he is financially able to replace it with a decent structure." From this proposal alone there could be reduced, declared Mr. Stevens, if the remaining 90 per cent. put forward the best effort of which each individual was capable, a substantial absorption of those in need could be achieved.

Touching on the world economic conference he said other parts of the failure is a mistake. Without doubt, the gathering together of such a concourse of distinguished persons and the personal contacts which inevitably ensued, must bear fruit in the future.

The steady increase of the business of Canada with other parts of the empire as a result of the imperial conference agreements, said Mr. Stevens, gave evidence that where genuine efforts of co-operation were made results advantageous to all may be achieved.

### New Kind Of Madness

#### Mild Man Turns Into Maniac When Driving Car

Powerful stuff—gasoline. There is a kind of gasoline intoxication that changes the entire nature of some men. Sometimes it is found that even the mild-mannered man who loves his family, is kind to animals and courteous to everybody, cannot stand gasoline at all. As soon as he gets into an automobile he isn't polite to anybody but a policeman.

On foot, he says "You first" or "Pardon me sir, may I step ahead?" or "That's all right, old man, I'm in no hurry." But seated in a vehicle propelled by gasoline, he gets a megalomaniac's view of the value of time. He may not be going anywhere in particular but he wants to get there right away.

He watches for the smallest opening to jam ahead. If he is thwarted in the attempt, he glares at the fellow who gets in his way and perhaps hurls an insulting epithet. If he is an unavoidable delay for a moment, he bawls his horn, and the aggregate efforts of the entire group of gasoline-intoxicated maniacs turns bedlam loose.

Filling the air with raucous mechanical blowing, howling and screeching is an attendant symptom of gasoline madness. Dashing ahead through traffic and hooting everybody out of the way is another. The manifestations vary with age and temperament of the subject, but even in the mildest natures the tendency is toward crude manners and lack of consideration.—Kingston Whig-Standard.

### Sunshades Not For Men

The sight of hardly engineers in New Jersey working under the shelter of sunshades aroused not a few persons to titillating comment until County Engineer Radigan explained the umbrellas were for the protection of the instruments, not the men. "The level instrument is so sensitive," Radigan said, "the effects of the rays of the sun would cause an error in the work."

Are you thin or fat? If you are here is advice for you. If you are thin, don't eat fast, and if you are fat, don't eat—Fast.

Bombay, India, now has 2,531 industrial establishments.

## WORLD HAPPENINGS BRIEFLY TOLD

Hundreds of men have gone to work in lumber and fishery operations on the British Columbia coast, according to government officials.

Harold Lake, who wrote the words for the song, "I Hear You Calling Me," died at his London home after a long illness. He was 61 years old.

Forty-six blind World War veterans travelled from all parts of Scotland recently to hold a reunion in Edinburgh.

Though patchy in some localities, the honey crop of western Canada will be a little higher this year than last year, according to C. V. Gooderham, Dominion apiarist, who completed a trip to the Pacific Coast.

Prominently mentioned as a possible Liberal candidate for Peel county in the forthcoming Ontario provincial election is Duncan Marshall, former Alberta Minister of Agriculture.

Renewed efforts to untangle problems that must be solved before the steel and oil industries are brought into the fold of "NIRA" were promised by Hugh S. Johnson, U.S. Industrial Administrator.

Thomas Laughlin produced a book and earned 3,000 coins on the desk of Miss Emory Robert, secretary of the Golden Gate Junior College in San Francisco, to pay his entrance fee. He saved the pennies during his high school days.

First of its kind in Australia is the special police branch organized by the air force, and first of the flying police is Aircraftman Snook, who is being specially trained to head the peace officers of the air. An expert flyer, he has had no previous experience as a policeman.

An improved mail service to Churchill began recently and will continue during the navigation season. Instead of only one mail each week, Churchill residents may now receive letters and newspapers on Wednesdays and Saturdays. Outgoing mail will also leave Churchill twice weekly.

### Mussolini Never Flinches

Even His Dentist Cannot Get Him To Admit Pain

Il Duce never flinches—not even in a dentist's chair.

"Questo ai fara soffrire un poco," says his dentist, "but most of his profession when about to embark on some delicate explorations of the oral cavity."

And Mussolini's answer to his soothing remark, when translated means: "This is going to hurt a little," invariably.

"Non temo il dolore (I do not fear pain)."

Dr. Arrigo Perno, of Rome, the man who for eight years has been the Italian dictator's private dentist, told how his patient carries on through the trials that he has to endure.

In Chicago to attend the Centennial Dental Congress, Dr. Perno said Il Duce fears neither the smart of the drill, or its descent into recesses of the tooth.

Assured by his patient that he has no fear of pain, he has been born down pretty hard at times, said Dr. Perno. He hasn't been able to get a sound out of Mussolini in eight years.

### Not a Certainty

Nazi Regime Will Go The Way Of All Such Movements

Chancellor Hitler says that the Nazi regime will endure forever. The interesting thing about that is not that he is wrong but that he thinks he is right. After five or six thousand years of recorded history the average man and woman know that nothing, in this world at least, can endure forever, or even for any really long time. But movements such as Hitler expresses need the kind of humorless fanaticism he enunciates to keep them going even the little while that they may endure.—New York Evening Post.

### Used New Type Balloon

In a new type balloon, Dr. Max Coyne, who was with Professor Pickard last summer in his ascent in the stratosphere, and Ernest Demuyter, a noted Belgian aeronaut, have made several trips lasting 24 hours or more. Most of their trips have been over Belgium and France. Their craft is equipped with devices to permit it to rise or descend at will, or remain stationary. Dr. Coyne plans to make a trip into the stratosphere.

Italy's wheat crop this year is expected to total 6,500,000 tons.

W. N. U. 2008

### Tells Time By Lights

Huge Clock in Paris Has Not Regulation Face and Works

Parisians are seldom concerned over the time of day. There is inherent in the French temperament too great a capacity for enjoying fully the present moment to permit any particular preoccupation with the passage of the hours. Engraved in the pastime of appreciating culinary delights, for instance, the Parisian would probably be inclined to resent having a "Big Ben" boom out the fact that he has been at the luncheon table two hours already. The absence

hitherto of any outstanding timepieces in Paris is probably explained by some such scruples, and at the same time explains the exceptionally great interest taken in the debut here of what is authoritatively described as "the biggest clock in the world."

Certainly it is one of the "tallest," for it is placed about two thirds of the way up the Eiffel Tower at the height of 636 feet, and it measures 63 feet in diameter. Besides its unusual dimensions, however, the French version of "Big Ben" has other claims to distinction. For although it is visible from almost any point in Paris, it has no face, no hands, and no works—at least not in the usual sense of the terms. The answer is that the new clock is a luminous one. The hours, from one to twelve, are simply great colored lights, or reflectors. The "hands" are lines of electric light bulbs, which burn for a minute, then go out, and the line further on is then illuminated to turn in its succession for one minute. The hour "hand" operates in the same way, but of course more slowly. The "movement" is regulated by a synchronous electric motor.—Christian Science Monitor.

### Recipes For This Week

(By Betty Barclay)

#### RIPE GRAPE JELLY

4 cups (2 lbs.) juice.  
7½ cups (3½ lbs.) sugar.

To prepare juice, stem about 3 pounds fully ripe grapes and crush thoroughly. Add ½ cup water, bring to a boil, cover, and simmer 10 minutes. Place fruit in jelly cloth or bag and squeeze out juice. (If Malaga or other light-skinned grapes are used, the juice of 1 lemon should be added to prepared juice.)

Measure sugar and juice into large saucepan and mix. Bring to a boil over hottest fire and at once add bottled fruit pectin, stirring constantly. Then bring to a full rolling boil and boil hard ½ minute. Remove from fire, strain, pour quickly. Paraffin hot jelly at once. Makes about 13 glasses (6 fluid ounces each).

#### CARROT AND CABBAGE SALAD

1 package lemon-flavored gelatin.  
1 pint warm water.  
2 tablespoons vinegar.  
1 teaspoon salt.

1 cup raw carrots, grated.  
1 cup raw cabbage, finely shredded.

Dissolve gelatin in warm water. Add vinegar and salt. Chill. When slightly thickened, fold in carrots and cabbage. Turn into individual molds. Chill until firm. Unmold on crisp lettuce. Garnish with mayonnaise. Serves 8.

### Historic Sites

Movement For Preservation Of Places Of National Interest Started In 1919

The movement for the preservation of national historic sites in Canada dates back to the year 1919. Representations were made to the then Dominion government urging the necessity of a national organization for the preservation of historic sites and as a result an honorary Historic Sites and Monuments Board was created. This board is composed of a number of eminent Canadian historians who have given their services without compensation. The recommendations of the board are made to the Department of the Interior, which through its national parks branch takes the necessary action.

### Waiting For Equipment

Lincoln Ellsworth, aviator and explorer, has arrived at Auckland, New Zealand to await the arrival of a vessel bringing an aeroplane and equipment for an Antarctic exploratory flight expedition, of which Ellsworth, Sir Hubert Wilkins and Bert Balchen are the leaders. Plans call for departure of the expedition from New Zealand in November.

Parisians can now read the time by a clock on the Eiffel tower, the illuminating at night lighting up a dial 61 feet in circumference.

## Winnipeg Newspaper Union

By Ruth Rogers

YOU'LL BE NEEDING SOMETHING SMART FOR TOWN! HERE'S YOUR MODEL

It's a youthful affair, rather suggestive of military styling.

Especially those who might consider a little slenderizing will find this model exceedingly attractive.

While a slate-blue sport crinkly crepe silk inspired the original model, a red and white patterned crepe, a dark blue and white polka-dotted crepe or grey crepe silk are other good schemes.

The cape is removable. The pattern provides for long or short sleeves.

Style No. 740 is designed for sizes 14, 16, 18, 20 years, 36, 38, 40 and 42 inches bust.

Size 36 requires 4½ yards 38-inch by ½ yard 38-inch lining for cape.

Price of pattern 30 cents in stamps or coin (coin is preferred). Wrap coin carefully.

### Problems Of Statesmen

Not So Easy To Manage Affairs In These Days

It is, of course, unfair to judge modern statesmen by the old standards. Statescraft today has not only to handle complexities that were undreamt of fifty or a hundred years ago, but it has to reckon with a democracy so keenly alive to its own importance that in all the chancelleries of the world it has become the terror that walketh by night. It was easy to run Europe—even to ruin it—when the Man on the Street was merely a speck on the horizon. Glasgow Weekly Herald.

### Belongs To "Flying Family"

Lord Londonderry's Youngest Daughter Becoming Efficient Flyer

Lord Londonderry, air minister, whose family may well be known as the flying family, has just gained his "A" certificate for flying at Heston airport, Middlesex.

To do this he completed a three-hours solo flight and passed an altitude test, and is now allowed to fly a machine, though he cannot take up paying passengers.

A few days earlier Lord Londonderry's second daughter, Lady Margaret Stewart, also qualified for her "A" certificate, and his youngest daughter, Lady Mary Stewart, who is not yet 13, is rapidly becoming an accomplished flier.

Lady Mary is one of the youngest if not the youngest, of flying pupils, and she is making such splendid progress that it will not be long before she will be able to make a solo flight.

Her instructor is Capt. V. H. Baker, chief inspector at Heston, who says, "She cannot obtain a certificate until she is 17, but will be permitted to fly solo within three miles of the aerodrome."

Capt. Baker also said that on his behalf, Lord Londonderry went up to 2,000 feet, shut off his engine and glided on to the aerodrome well within the specified landing area.

### The Late Dr. Macoun

Contributed Largely In Establishing Possibilities Of Agriculture In West

The death at Ottawa of Dr. William Terrill Macoun, Dominion Horticulturist, was recently reported. After taking ill on his annual inspection of experimental farms during which he attended the World's Grain Exhibition at Regina, he returned to his Ottawa home early in August. Dr. Macoun was in his 65th year.

His career in horticulture, which to him was both a profession and a hobby, has been outstanding. His efforts in establishing the possibilities of the western provinces for agriculture date back to the '70s. Accordingly, he gave many years to the breeding of new varieties of apples, and by the unanimous vote of the American Pomological Society, convening at Roanoke, Virginia, in 1930, was awarded the Wilder silver medal for professional work in pomology.

Born at Belleville, Ont., in 1869, Dr. Macoun joined the Dominion Central Experimental Farm when 18 years of age.

Surviving him are one son and three daughters, residing in Ottawa, and a sister, Mrs. R. A. Kingman, Wallingford, Vt.

### Caravans Travel By Tractor

Camels No Longer Take Mohammedans To Holy City

The romantic camel caravan of the Arabian deserts has gone into history, according to Rev. S. M. Zwemer, Presbyterian missionary.

Automobile bodies adjusted to caterpillar tractors have entirely supplanted the camel, he said today, in conveying the thousands of Mohammedans across Arabia on their annual visits to the Holy City.

Even in these dull years, he said, at least 50,000 annually make the pilgrimages.

### Supplies Shipped To North

A rush order of 10 carloads of supplies for Hudson's Bay Company posts in the western Arctic has been shipped by waterways to replenish posts in that section of the north-land. The order was made necessary as a result of the disbandment of the S.S. Anxyox, which was turned back by ice flows in the north Pacific.

## SUNDAY SCHOOL LESSON

AUGUST 27

SAIL

Golden Text: "Behold, to obey is better than sacrifice."—Samuel 15:22.

Lesson: 1 Samuel, Chapters 9-11.

Devotional Reading: Psalm 40:1-8.

Explanations and Comments

Saul Disobeys Samuel's Order, verses 1-12.—Samuel directed Saul to utterly destroy the Amalekites—all the people and all their possessions. Saul carried out the order, only he spared Agag the King of the Amalekites, and the best of their sheep, oxen, fattings and lambs. It was really a test whether the king would be ruled by God through Samuel his prophet, or whether he would be a self-willed despot. He proved to be the latter.

On learning what Saul had done Samuel was very angry and set out to meet him.

Saul's Falsehood and Then His Attempt To Shift the Blame, verses 13-15.—"Blessed be thou of Jehovah," were Saul's words of greeting when Samuel met him at Gilgal. This was a common form of salutation, yet Saul's use of it here may have indicated a guilty conscience and a desire to conciliate the prophet by a gracious greeting.

"When my ten-year-old son comes in from school with an affectionate greeting, I begin to sit up and take notice. When he is usually so voluble, and his laughter seems forced, I think at once of a partridge flitting across the hunter's path with drooping wing, to lure him from his near-by nest. When he manifests an extraordinary solicitude for my health and for my fatigue under the duties of the day I am sure that something has happened at school; and if he is careful to steer all the conversation away from the school, I know that I must begin to conduct a careful examination."

Then Saul sought to forestall the accusation which he felt was coming by stoutly announcing, "I have persecuted the Amalekites, as thou hast commanded me." He was convicted of falsehood by circumstantial evidence, for Samuel had said that he had seen the bleating of the sheep in mine ears, and the lowing of the oxen which I heard.

"Ah, yes, those oxen and sheep," Saul may have said, while he hastily thought what answer he could give. But the presence of the large flock of sheep and the lowing of the oxen, which he was to see, were the evidence that he was lying. "But those belong to the people, it was they who spared them," he then said. "I am telling you what I saw." Saul was so sure that his word was law should attempt to excuse his violation of the prophet's command by saying that he could not help it, that the presence of the animals was weak. Having shifted the blame from his own shoulders he proceeded to exonerate the people, claiming that the animals were the best of the spoil and had been preserved for the best of the people. He offered in sacrifice to God, Aaron's excuse for the golden calf. The people had brought their gold and he had cast it into the furnace. "And there came out this calf," he said to Moses, when Moses arraigned him for his sin. He, too, said, "I did it, I did it, I did it, I had built an altar before the image and proclaimed a feast to Jehovah. Adam blamed Eve, and Eve blamed the serpent."

"Very rarely indeed does a man excuse himself to other men and yet remain absolutely excused in his own eyes. When Pilate stood washing the responsibility of Christ's murder from his hands before the people, was he feeling himself as if his hands were cleaner while he washed? Men differ, perhaps, nowhere else more than in their disposition to face the acts of their lives and to recognize their own personal part in the responsibility for the things that they do. Let me say to you, my friends, that I have refused to listen for one moment to any voice which would make my sins less mine."—Phillips Brooks.

### Ignore Shell Fire

Halifax Yachtsmen Have Faith In Marksmanship Of Artillery

Artillery men who direct their fire at floating targets in Halifax harbor pay no attention to yachts that cross their line of fire—and the yachtsmen pay no attention to them.

Racing yachts tack back and forth in the firing area each Saturday afternoon but none of them has ever been hit. High velocity shells scream directly overhead, passing within a few feet of the boats before they splash into the water near the targets and the yachtsmen continue placidly on their course.

Time was when the yachtsmen would keep a wary eye on the guns as their craft entered the danger zone; but now, so accurate is modern artillery marksmanship, they no longer regard it as a danger zone and sail by with scarcely a glance at the battery.

Licenses to keep cows are issued by the London County Council to fifty places in the County of London, most of these being in the East End. There are more than 1,000 cows kept in this way.

For the first time in England scientists in the university laboratories at Oxford have liquified helium, the non-inflammable gas for airships.

Increasing number of tourists are visiting Mexico.

## Idea Is Sound One

Gloomy Dean Thinks Ministers Should Have Knowledge Of Medicine

Dean Inge has an idea that it would be a good thing to have ministers study a little medicine. He made the suggestion at the London hospital medical college and dental school, where he was distributing prizes, and hastened to add that the did not want persons to usurp the proper functions of doctors. His idea is a sound one.

It has so much common sense in it that it will probably never be put into practice. Man is a curious being. Made up of soul, mind and body which react on one another in many complex ways, he has to be studied as a whole. The intersection between the physical and moral sides of a man's nature should not be ignored by the clergyman. A minister's work may be more effective if he had enough medical training to tell him when a person who was morally ill required also medical treatment to have harmony restored.—Hamilton Spectator.

### Chivalry In Chicago

Young Man Proved His Willingness To Oblige New York Visitor

The thing that impressed a New York woman most about Chicago when she visited there for a few days was not the Century of Progress at all, but the gesture of a young man one afternoon on a street car. The New York lady, who is young and pretty, was riding on this street car from the Loop to the house of the friend she was visiting. She thought she knew where to get off, but pushed the button too soon, and the car stopped two blocks before her corner. When nobody got out, the motorman turned and glared.

"Well, who gets off here?" growled the motorman. The young lady was too scared to say anything. There was a short, awful silence. Finally a young man sitting beside her tongue-tied heroine stood up. "Well," he said, "I'll get off if no one else will." And he did.—The New Yorker.

### Separated Fourteen Years

French Soldier Finds Daughter On Eve Of Her Wedding

A baby girl abandoned fourteen years ago by her mother, when the latter was forced to see life from the streets, has been found by her father on the eve of her wedding day. Mile. Madeline Colette Rollet—her real name—was adopted and brought up as a "regular" member of the family of her foster parents. She attained the age of 18 and was betrothed when her own father succeeded in locating her. After demobilization Rollet tried to find his family but succeeded only in establishing that his wife was dead. It was merely by chance that he traced his child to her present address in Lille, France.

### Hard To Break Habit

Southerners Having Difficulty In Making Mules Plough Up Cotton

An unexpected difficulty attending the United States farm administration's cotton reduction campaign centers about the humble, if stubborn, mule. Paul A. Porter, of the administration, returning from Washington from the south, reported that many farmers had complained they found difficulty in getting their mules to "act right" while plowing up the cotton. "It isn't the mules fault, at that," Porter explained. "All these years he has been lamed by if he walked atop the cotton row. Now it is the reverse, and he is being asked—if using singly—to trample down the stalks he has been trained so carefully to protect."

### Record Output Of Shoes

June Production For Canada Given As 1,965,647 Pairs

The June production of leather footwear in Canada at 1,965,647 pairs was the largest output recorded for any month since January, 1929. That figure represents an increase of 211,083 pairs or 12 per cent. over the preceding month and an increase of 496,455 pairs or 26 per cent. for the corresponding period last year. Exports of leather footwear in June last amounted to 2,081 pairs, an increase over the preceding month of 1,659 pairs and an increase of 776 pairs over June, 1932.

"If you had eight pennies and lost three, how many would you have left?"

Little Cohen thought for a minute. "But for v'y," was his puzzled reply, "should I lose three pennies?"

Spain's iron ore exports are again growing.

"All I can say is that if Queen Elizabeth slept in this bed she was drugged!"—The Humorist, London

## Occasional Wife

EDNA ROSS WEBSTER  
Author of  
"LIPSTICK GIRL" etc.

## SYNOPSIS

Camilla Hoyt, young and beautiful student in an art school, unconsciously sketches the head of a fellow student during the class and when she is supposed to be drawing a Grecian urn. The professor, looking at her sketch, embarrasses Camilla by having Peter Anson, the boy whose head she sketched, criticize her work before the class. Afterwards Camilla goes to the park outside to cry. A hand touches her shoulder. It turns out to be Peter, who apologizes for his action and consoles her. Camilla secretly adores him. He makes a date to see her that evening but is astounded when she names an expensive night club. It is far beyond his means but he resolves to go through with it. Peter takes her to the theatre first and then to the night club where they meet some of Camilla's friends. After taking her home, Peter resolves not to take Camilla out again, because of the expense. He is only a struggling artist. Camilla wonders why he did not ask her to go out again.

[Now Go On With The Story]

## CHAPTER V.

Peter left himself into the ugly room which he shared with Gus Matson. He despised its blatant wallpaper and clumsy furnishings, but his artistic and imaginative eye looked beyond it to the beautiful studio suite that he would occupy some day, and endured it. Gus' hands were covered with gray modelling clay. He wore a soiled red suede jacket—Peter's—and smoked a briar pipe.

"This is a swell hour for you to be checking in," he reproached Peter. "Out with some skirt!"

"A girl," Peter corrected, hanging up his hat and coat.

"Another high-bat dame, I suppose, since you didn't invite me to the party. If you'd take my advice

popular everywhere Gus was an outsider—only Peter's friend, which tendered him a certain advantage.

"Cost you plenty, too, I'll bet," Gus continued his reproof.

"Too much," Peter conceded. "But it was worth it."

"Is she going to finance you for a couple of years in Paris?"

"No—oh, no—I only meant that being with her tonight was worth the money it cost me."

Gus snorted. "If you don't watch your step, you'll be falling for some dame and lose your balance completely. Well, c'mon, it's time we hit the hay."

"You insist on waiting up for me, don't you, mama?" Peter grinned with good humor. "I appreciate your concern, but really I'm a big boy now and can take myself in."

"That's what you think. But you know I can't sleep while you're prowling around, and you might be considerable enough to turn in at a decent hour once in awhile."

Quarrelling with Gus was worse than arguing with a woman, because he not only had the last word, but he never sought a reconciliation later. Peter kept his silence. He was determined to see Gus through the year. Next month would be the end. He had offered to help him early in the year and insisted that he be in out of sympathy when he got down with pneumonia and almost developed tuberculosis, due partly to undernourishment. Gus was hanging on to finish National, with a tenuous grip on Peter; then he would show the world something, he boasted. Success to Gus, was like a big dive—one big spectacular splash, and you were made. Peter suspected that it was more of an endurance swim, for which you had to train patiently.

"I planned to. But—"

"There can be no exception to the plan. I expect you to have an entry in the exhibit."

"I'll try it."

"Something is wrong, Anson. Is there anything I can do?"

Peter's head went up defiantly. "Thank you, sir. No, there's nothing you can do. I'll manage somehow."

"Then if I can be of any assistance in advising you about the exhibit, let me know."

"Thanks. I'll do that," Peter escaped his quizzical inspection and swung through the entrance of the building into the path which cut through the park toward the museum. He usually took the shorter way, and it was on one of the benches near the lilac hedge that he had found Camilla several days before. She, not knowing that he passed that way often, had gone there directly from class, to be alone and think what to do about Peter.

He found her there again. She was not crying this time, but even before she saw him, he knew by the forlorn little picture she made, that she was afflicted with the black-blue again.

Why a girl like Camilla should have any of blue was beyond his imagination. She had the world in her lap. Perhaps that was just why. She didn't know what real trouble was, so the least difficulty assumed exaggerated proportions for her.

His step on the path startled her. "Oh!" she exclaimed and flushed.

He had been startled, too, seeing her there where they had first talked together, but had had a moment to calm his violent reactions before she discovered him.

He smiled ruefully. "Is this a favorite rendezvous of yours?"

"This is a public park, isn't it?" she retorted with a calmness that belied the furious beating of her heart when his sudden appearance had disturbed. Always, she felt as if she must resent anything Peter Anson said to her, at the same time that she wanted so much for him to talk to her. And wondered why she could resent him so much when she loved him so.

"Why—of course," his tone was puzzled at the defense in her voice.

"That is why I take this path from the art school to the museum. And because I like to walk here, especially now when the lilacs are in bloom."

"That is why I like to come here, too," her voice was softer and she looked up at him with a timid smile. (To be Continued.)

Sheep In Long Trek

After passing through country generally considered impassable, Drove Jack Brady and eight helpers have just completed a drive of 7,000 sheep for 1,300 miles from Mackinlay to Snowtown, Australia. To water the animals in desert spots a pumping plant and troughing was carried. The trip required 20 weeks and at night a guard against raids by wild dogs was necessary. Only 300 sheep died on the trip.

Their greeting, the next time they met, was constricted, Camilla was aloof because he had made no attempt to see her again; Peter was reticent because there wasn't a chance that he could ask her for another date. Seeing their host hostility, no one could have guessed that a few evenings previously they had dined in ecstatic embrace, been oblivious of the world in their thoughts of each other.

Peter astonished the professor with the worst work he ever had seen and Camilla astonished even herself by doing her best. Such is the illogical effect of youthful love. But Camilla was spunky and determined. When

and quit tryin' to be a highbrow, you'd get farther," he sneered.

"It's the highbrows who will put me where I want to be, Gus, and you, too," Peter offered cheerfully. The scene was familiar to him. Gus had ambitions similar to his, but he was cautious of Peter. His plain almost ugly face and sandy hair added nothing to an unattractive personality. He was clever at modeling and a hard worker, and Peter wished mightily that he could persuade Gus to cultivate more graciousness. He was fond of the fellow in a way. But Gus scorned all such suggestions, believing that he knew all about the proper attitude toward a hard-bodded world. At the same time he profited by other advantages which his association with Peter afforded him. Obligated as he was to economize, Peter never was penurious, and his personal charm enabled him to earn more than Gus, who resented that his friend was favored everywhere; by the teachers, the landlady, employers, friends and acquaintances. Peter was

The next few days went very badly for Peter. Professor Drake's class met only two days a week, so he did not see Camilla again until on Friday. She had feared that he would not communicate with her soon, hoped anxiously that he would, and plunged into humiliation and despair when he did not. One evening with her had been enough for him, she decided. A one-nighter She might have known. Handsome men like Peter invariably were concealed philanderers. The conquest of a woman's heart did not appeal to him, because he knew that he could have any woman of his choice without a conquest.

She wished miserably that she had refused to go out with him the first time he asked her. That might have stimulated his interest for a longer time. Then, what if he never asked her again? At least, she had one personal memory to cherish in her heart through the long bleak years ahead. They were going to be so desolate—without Peter.

## Advance in Wireless

Communication With Micro Waves

Being Developed

Communication with micro waves a foot and a half long over distances greater than the range of vision and through or around physical obstacles was reported before the science department of the Royal Academy by Guglielmo Marconi, noted wireless inventor of Italy.

Engineers had believed such opaque objects as buildings, mountains, etc., had the same effect on these waves as would be in the case with a searchlight or other form of light beam.

In a series of tests conducted between the inventor's yacht "Elettra" in the Tyrrhenian sea, and inland station at Santa Margherita, 96 miles landward, a distance three times further than he had been able to get heretofore.

Even with the "Elettra" anchored at Porto Santo Stefano, a distance of 161 miles from Santa Margherita, faint code messages on a 50-centimeter wave were picked up on the yacht despite two intervening mountainous promontories, indicating that the micro waves were not hindered by opaque objects.

Twenty-five watts of power were used, Marconi said, in a newly developed micro-wave combined transmitter and receiver. He added that he hoped through the development of more sensitive apparatus to be able to bring about further important advances in the art of radio communication.

**Floating Airports For 'Planes**

What Seemed Like Fantastic Dream Now Virtually a Reality

Aviation's once fantastic dream of conducting a regular trans-Atlantic service with the use of floating airports has virtually become a reality.

Following successful tests with the steamship "Westphalen" anchored in mid-Atlantic between Africa and Brazil, the German "Lufthansa" plans to inaugurate in the autumn an air-mail service between Germany and Buenos Aires, Rio de Janeiro and other South American points.

Two planes will be used, each making half of the ocean trip. Terminal points will be Bathurst, British Africa, and Natal, Brazil. The planes, for example, which departs from Bathurst will proceed to the steamer (one day's flight), transfer its mail to the second plane, which will then be catapulted on the second stage of the journey (also a day's flight) to Natal.

Aboard the floating airport, the waiting planes will be thoroughly checked over and refueled for the return trip.

Each plane will carry a personnel of three men, including a radio operator. Mail will be brought to, and taken from, each terminal point by land planes.

Lufthansa officials told the United Press that the two-and-a-half months' test entirely proved the practicability of the project. It is now planned to purchase and equip a second vessel as a relief for the "Westphalen."

**Japan Stages Sham Battle**

Elaborate Performance Of Aerial Attack Seen By Millions

Fifteen million people in Tokyo and surrounding prefectures tasted warlike life when a three-day sham battle for possession of the capital was launched by the army and the navy.

Three times during the day "enemy" aeroplanes roared overhead and sirens screamed warnings to the populace. Smoke bombs and vari-colored vapors were loosed in the streets, simulating poison gas and incendiary explosives.

Emergency hospitals were set up and to them stretcherbearers wearing gas masks, carried the supposed wounded, while from public parks and the roofs of big department stores anti-aircraft guns and machine-guns barked and chattered.

There was one genuine casualty. A girl watching one of the air raids from a roof fell and was killed.

The assumption was that the air raiders came from enemy battleships approaching Tokyo Bay from the mid-Pacific. The whole show formed the second phase of the grand air manoeuvres of the navy.

**Blown To Safety**

When an explosion followed the fall of an aeroplane into the sea at Skegness, England, and wreckage was strewn over the water, life-savers

went to the rescue in a speedboat though their trip ended in disappointment. They found the flyer swimming about unharmed. He said that the blast had blown him clear of the plane.

## Pure White Swallows

Strange Albino Birds Found In Quebec Village

Reports that a nest of pure white swallows has been discovered in a barn at Danville, Que., have aroused considerable interest among ornithologists in Montreal.

Miss Edna E. Wilson, of Danville, who made the discovery, declares that the nest of pure white swallows has been raised by ordinary barn swallows.

"There are three fully grown birds now," she says.

M. Mowley, bird expert at McGill University, points out that while white swallows are not unknown, it is phenomenal that the entire brood of two swallows apparently normal should be albinos.

The finding of a nest of white swallows, he said, is extremely important in research work on ornithology and genetics. I intend to follow up the matter immediately."

If it is true that the entire brood are pure albinos and that the parents are normally pigmented, the finding, it is pointed out, will cause heated discussion among savants in the field of heredity, for such a discovery seemingly transgresses the known laws of heredity. The natural condition would be to find the brood mixed, some showing signs of albinism and others being normal.

**Moisture Conservation**

Policy Of Cutting Down Trees Instead Of Planting Them

We have been penny-wise, pound foolish in western Canada. We have worked at drainage, to bring little tracks of land under cultivation for our needs, when what we really needed was to work as hard as we could at the conservation of the available moisture. And we have cut down trees for firewood when we should have been planting them in hundreds of millions.

The most enlightened project in the United States today is the reforestation plan on which the unemployed are being put to work. Manitoba, Saskatchewan and Alberta should be working on the same lines to the limit of their resources.

The single unemployed man's camps in western Canada are mainly employed in cutting down trees, clearing national parks, and so forth. They would be much better employed in planting trees, over large areas, in the southern farming section, and in building dams on the South Saskatchewan and other rivers to create reservoirs for subsoil moisture—Winnipeg Tribune.

**THE RHYMING OPTIMIST**  
By Alice Michelson

Time is so kind, yet strangely cruel-kind.

For slowly, hour by hour, and day by day.

He builds the well-loved image in the mind.

Although the heart would have each dear line stay.

He tolls unrelenting, without a pause, With imperceptible, small movements steals

The memories that are the cherished gems Of all the grief the stricken spirit feels.

His skillful hands thus in the end efface The things once held most precious in the thought;

More faint, more dim, until no misty trace Of voice or eye or passion's self is caught.

Forgetting, then, all glories left behind, Our lives grow calm, we say that time is kind.

**Women Detectives**

Three Women Appointed To Staff Of Scotland Yard

Three women have been appointed as permanent members of the detective staff at Scotland Yard for the first time in the history of the metropolitan police.

The innovation, the latest of many reforms recently initiated by Lord Trenchard, the chief commissioner, followed experimental tests of women's aptitude for criminal investigation which proved eminently successful.

**Establishing T.R. Colony**

Amid the vine-clad slopes of the Dordogne, France has established a community of hope. For Clairvivre, the French town, newly-arisen, near Salagnac, offers new life for the ex-servicemen fighting his last long battle with tuberculosis.

Clairvivre was planned that tubercular ex-servicemen should not be separated from their families. It will accommodate 3,000 inhabitants.

**Girl Finds Ancient Well**

Expedition In Palestine Over Success

It was mainly through the bravery of a Sudanese girl named Salome that an ancient well was discovered in Palestine. The Garstank expedition found a hole only large enough to hold the form of a slim woman.

Salome volunteered to find what lay below. She was lowered by a rope into the hole and dug along its course for 50 feet. Then she was hauled to the surface and men replaced her at the work. When several large boulders were removed a well nearly 250 feet was discovered. It was 18 feet of water, which was quite potable. The find was at Tell-Duweil, and experts believe the well was sunk in the time of the Hyksos, a dynasty of Egyptian rulers often called the "Shepherd Kings."

**Saying It With Music**

Composer Aims To Turn Sports Into Orchestral Symphonies

If you want to know how a sock on the jaw sounds musically, Ferde Grofe, the New York composer, is preparing to enlighten you.

Also what orchestral sounds go into a bike race, hockey game, a track meet and other sports.

The composer of "Grand Canyon Suite" and "Tablino" now is mapping his next composition, to be called "Madison Square Garden," and containing these movements: 1, Six-day bike race; 2, track meet; 3, hockey game; 4, horse show; 5, championship bout; 6, circus.

Editor—"Do you know how to run a newspaper?"

Applicant—"No, sir."

Editor—"Well, I'll try you. I guess you've had experience."

Electric power use and carloadings are increasing in Italy.

Cheese is again becoming popular in Great Britain.

**TIED AND IRRITABLE?**

Take Lydia E. Pinkham's Vegetable Compound

It steadies the nerves and helps to build you up. You will eat better... sleep better... look better. Life will seem worth living again. Remember that 98 out of 100 women say, "I feel like a new woman. Let it help you, too. Liquid or tablet form, as you prefer."

## Little Helps For This Week

"I have taught thee in the way of wisdom; I have led thee in right paths."—Proverbs 4:2.

We know not what the path may be As yet by us untrod; But we can trust our all to These Our Father and our God.

—W. J. Irons.

We have very little command over the circumstances in which we may be called by God to bear a part, unlimited command over the temper of our souls, but next to no command over the outward form of trial. The most energetic will cannot order the events by which our spirits are to be tested. Powers quite beyond our reach, death, accident, fortune, another's sin, may change in a moment all the conditions of our life. With tomorrow's sun existence may have new aspects for any one of us.—J. H. Thoms.

Look not out at what stands in the way, but look in where the law of life is written, and the will of the know what is the Lord's will concerning thee... I. Pennington.

## BOWLING ALLEY OPENED

Albert Sapeta's bowling alley re-introduces an old sport into Coleman, and it was the centre of interest on Saturday last when he opened up. Tom Lloyd of the Rialto pool room and Bill Bell of the Grand Union hotel formally opened the new alley by playing the first game, in which Lloyd won by a narrow margin. Ed. Ledieu and L. Distel also tried their hand and made a good showing. If interest is maintained in this healthful exercise, Mr. Sapeta states he will install an additional alley. Some of the curlers will be able to keep their hand in when they cannot play at the rink.

It is of interest to recall that 17 years ago Frank G. Graham operated bowling alleys in the store where Mrs. Ferguson's confectionery is now established.

The top score at the bowling alley recorded up till Tuesday was by Alphonse Destobel with 284 in five pins. This is considered a remarkable score. Other good scores are Tom Lloyd, who played the opening game against William Bell, with 188; John Ouschuk 191, Mr. Vollandorf with 198 and Henry Zak 194. So much interest has been aroused in bowling that the pool tables in Sapeta's pool room have been almost deserted.

Prompt Pay builds your Credit and Credit Builds your Business.

## COLEMAN BOWLING SOCIETY

Result of race from Bow Island to Coleman, air distance 141 miles:

T. Jackson	709 yds per min
J. Anderson	706 yds per min
T. Jackson	706 yds per min
Wm. Harrison	701 yds per min
Chas. Makin	685 yds per min
Wm. Pryde	5174 yds per min
J. Anderson (2)	5171 yds per min
J. Anderson (2)	5169 yds per min
Wm. Roughhead	4704 yds per min

First prize, ham donated by Empire hotel. Second prize, 2 pairs of socks, donated by Mr. Walter Bobbitt.

Do not overlook the fact that a sale is never really made until it is paid for. If you anticipate trouble in making the collection, what is the use in making the sale? Collection costs are sometimes expensive.

If you believe in purchasing printed matter which is produced at fair wages instead of by sweated cut-throat competitive prices, buy from The Journal office. Day from those who are established here.

Mr. A. Oliva is down from Nelson till Saturday evening.

Coleman football team will play a game in the C. N. F. league cup series at Blairmore on Sat., Aug. 26.

Mr. S. Janostak is spending two weeks holiday at Vancouver.

## Personal and Local

Mrs. Victor Cyr, Gordon and Ruby spent a week visiting relatives at Lethbridge and Canola.

Mrs. E. V. Peet and children returned on Wednesday after a holiday at the coast cities.

Mrs. F. B. Buch and daughter Majorie of Lacombe are visiting Mr. and Mrs. Jim Frame.

Mrs. G. Hope entertained a few ladies at bridge at her home on Monday evening.

Several from the Pass towns are taking advantage of the excursion rate of one cent a mile to spend a holiday at Vancouver.

Mr. and Mrs. M. W. Cooke spent the week end at Waterton Lakes, visiting Mr. and Mrs. C. W. McKinnon, who are holidaying there.

Mr. and Mrs. W. Vincent and family have returned from Sylvan Lake where they have been spending the last two weeks.

Mr. and Mrs. T. Holstead and Audrey have returned after spending two weeks at Edmonton and various other points north.

Mrs. A. E. Graham and Jackie returned this week from Sylvan Lake where they have been spending three weeks vacation.

Mr. Fred Antrobus, George Hope and E. V. Peet returned Wednesday morning from the coast where they have been holidaying for the past two weeks.

The power shovel which has been working for McGillivray Co. has been moved to Michalsky's land east of Coleman, to make a ditch to divert water from the river.

Mr. and Mrs. W. Gate and family, and Mr. and Mrs. W. Dutil and Mr. W. Machin returned from their holiday at the coast on Tuesday.

Posters are around town advertising a holiday celebration at Fernie on Labor Day. Bellevue is also holding its annual exhibition and sports on that day.

Mr. and Mrs. F. M. Thompson, Roland Pinkney, of Blairmore, and Mrs. Wm. Burrows and daughter Dora of Coleman, left this week by car for Vancouver.

A number of men from the airport camp were in on Tuesday evening playing football. A playing field is being laid out at the camp, as there are several good players there.

Dr. R. K. Little leaves this week for the Century of Progress exposition at Chicago, motorizing to Shelby, Mont., and thence by train. His dental office will be closed till after Labor Day.

## Good Baseball Game at Bellevue Tuesday

Playing to a 1-1 score, Coleman and Bellevue baseball teams played a fast game on Tuesday evening. Coleman scored in the first inning. W. Fraser getting home from third base on a sacrifice hit by Idris Haysom. Bellevue scored in the sixth inning, Andy Morris making the hit which brought home a run for his team. Paul Yagos pitched for Coleman, Sonny Richards, catcher; Mills pitched for Bellevue, Andy Morris, catcher. Angelo Gentile umpired.
